PERSONAL PROJECTS

Civic Engagement Platform
- Civic Engagement Platform app can play a significant role in empowering citizens and enhancing transparency between citizens and local government authorities. It is like citizen portal with new features.

Messaging Application
- A messaging app where users authenticate with Google. Once authenticated, their names are added to a contact list. Users can then message anyone who has also authenticated with Google.

To Do Application
- A To do app that stores data in Firestore. If the internet connection is unavailable, data is stored locally and then synchronized with Firestore once the connection is restored.

Unscramble
- In this app, users engage in a game where the challenge is to unscramble given words.

Caesar Cipher
- This application uses Caesar cipher to encrypt and decrypt a message. This message can be shared with other applications.

Live News
- Application for smart television (TV)/ Android TV that streams some live news that is already available on YouTube.
